

3rd Gaia-X hackathon

service portability with

VMware Tanzu™

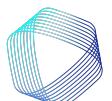

vmware®

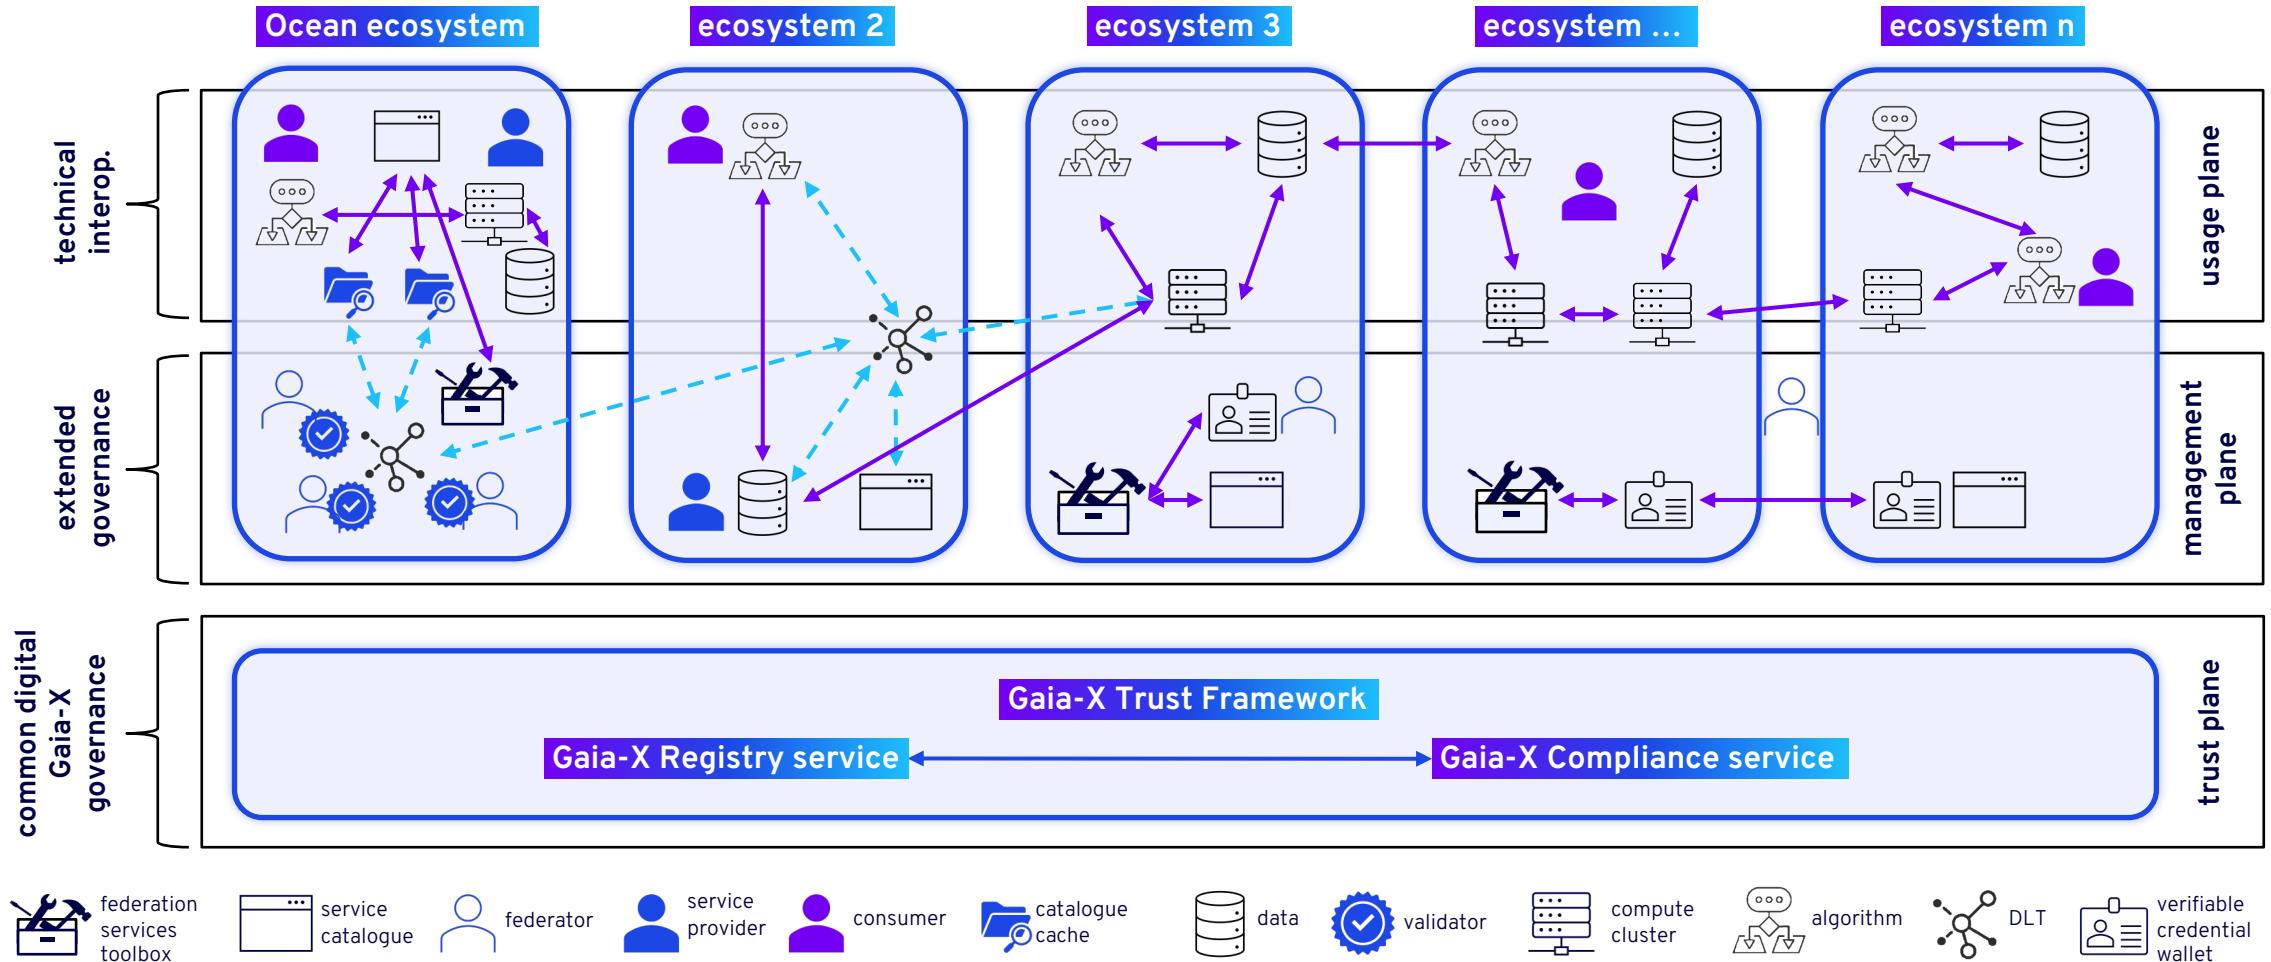

deltaDCC

content

- ▶ a federation of interoperable ecosystems
- ▶ composability by design
- ▶ portability: Multi-cloud deployments with VMware Tanzu™
- ▶ demo: deployment of a Federation Service with VMware Tanzu™ & connection to the Decentralized Core Grid

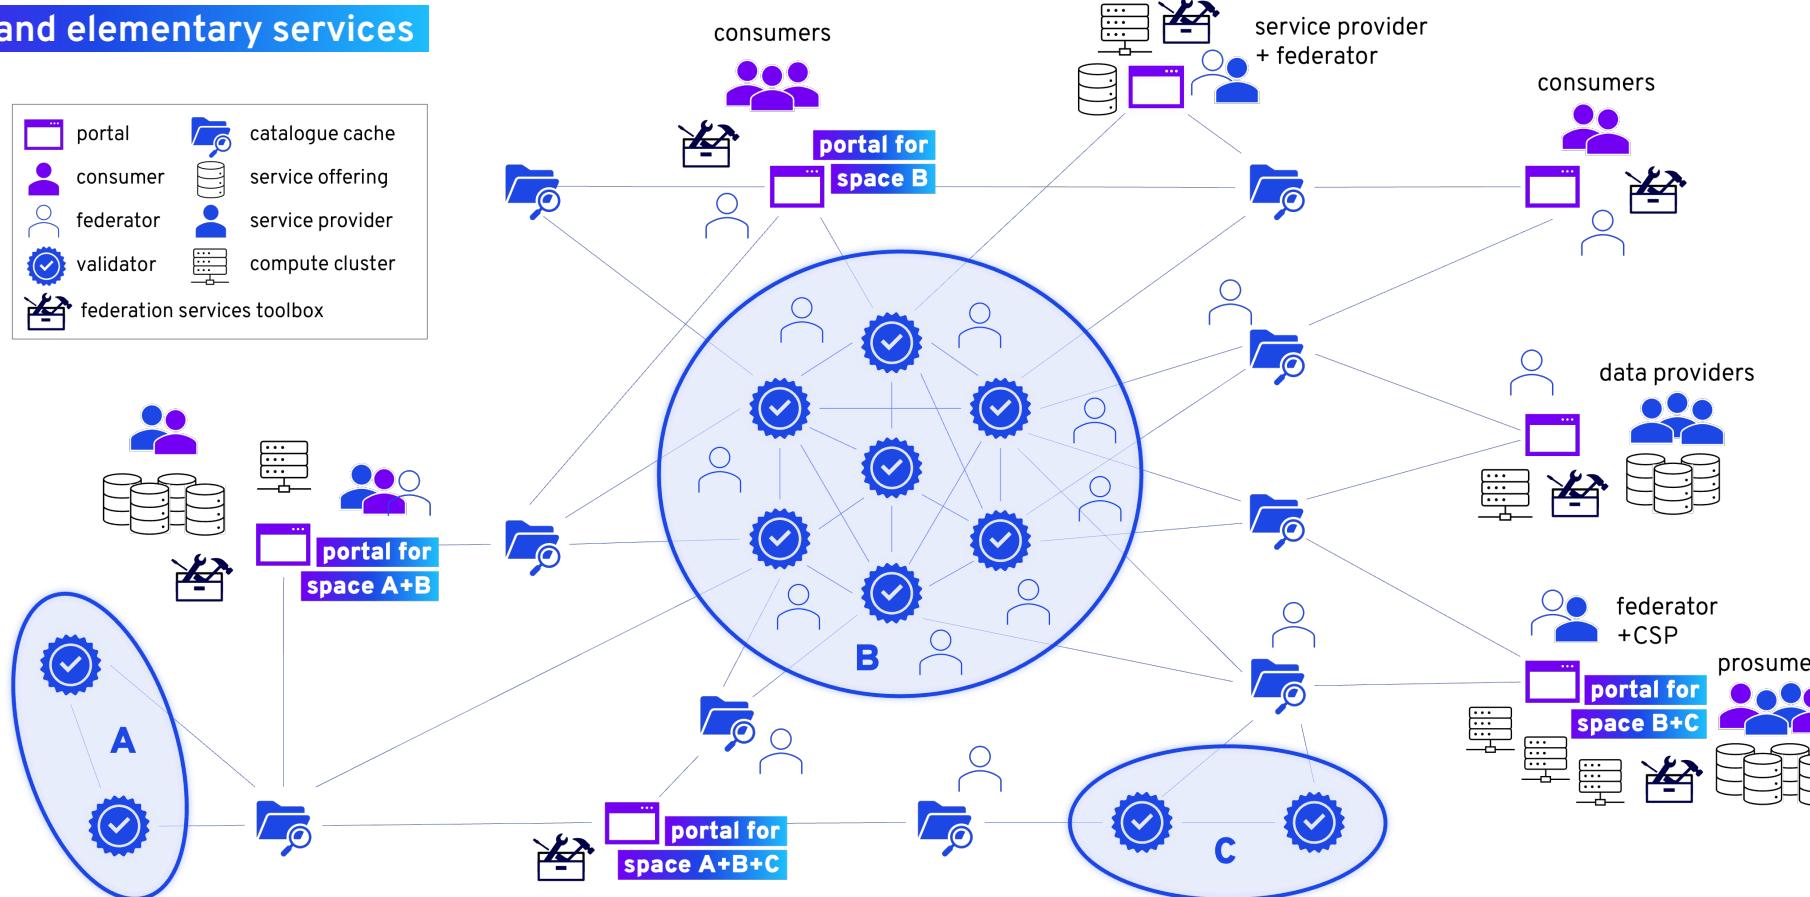

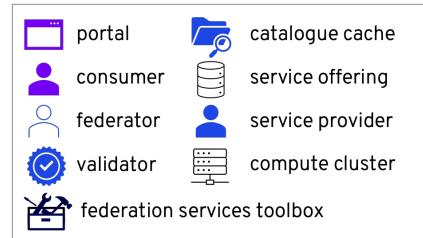

federation of interoperable autonomous Gaia-X ecosystems

composability

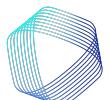

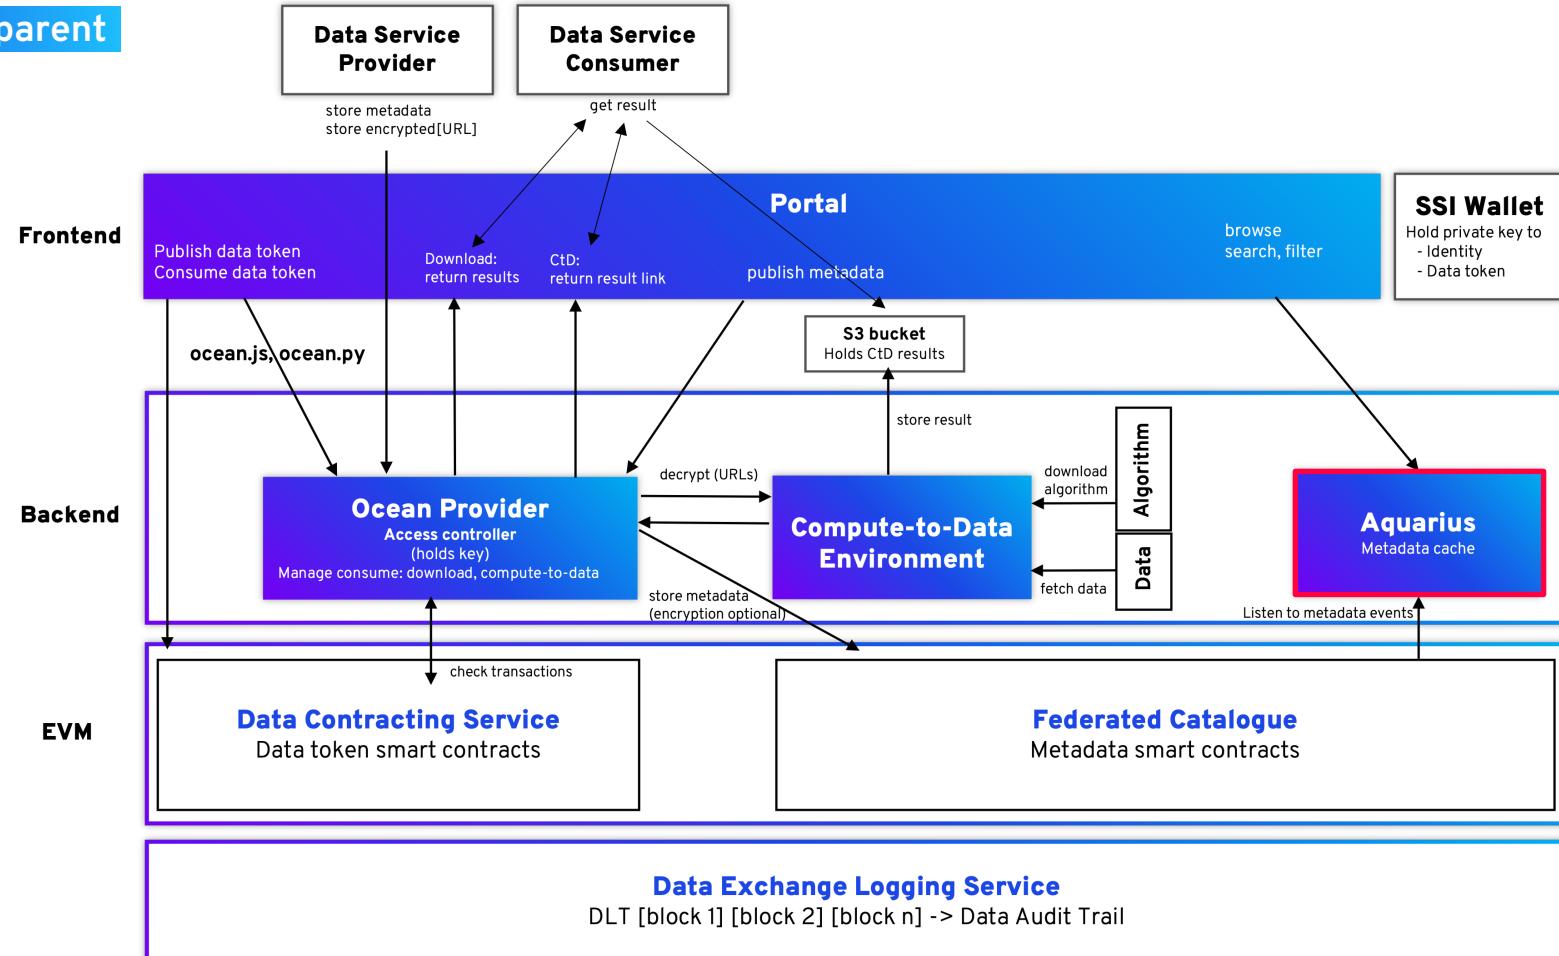

creation and connection of complex services

from atomic and elementary services

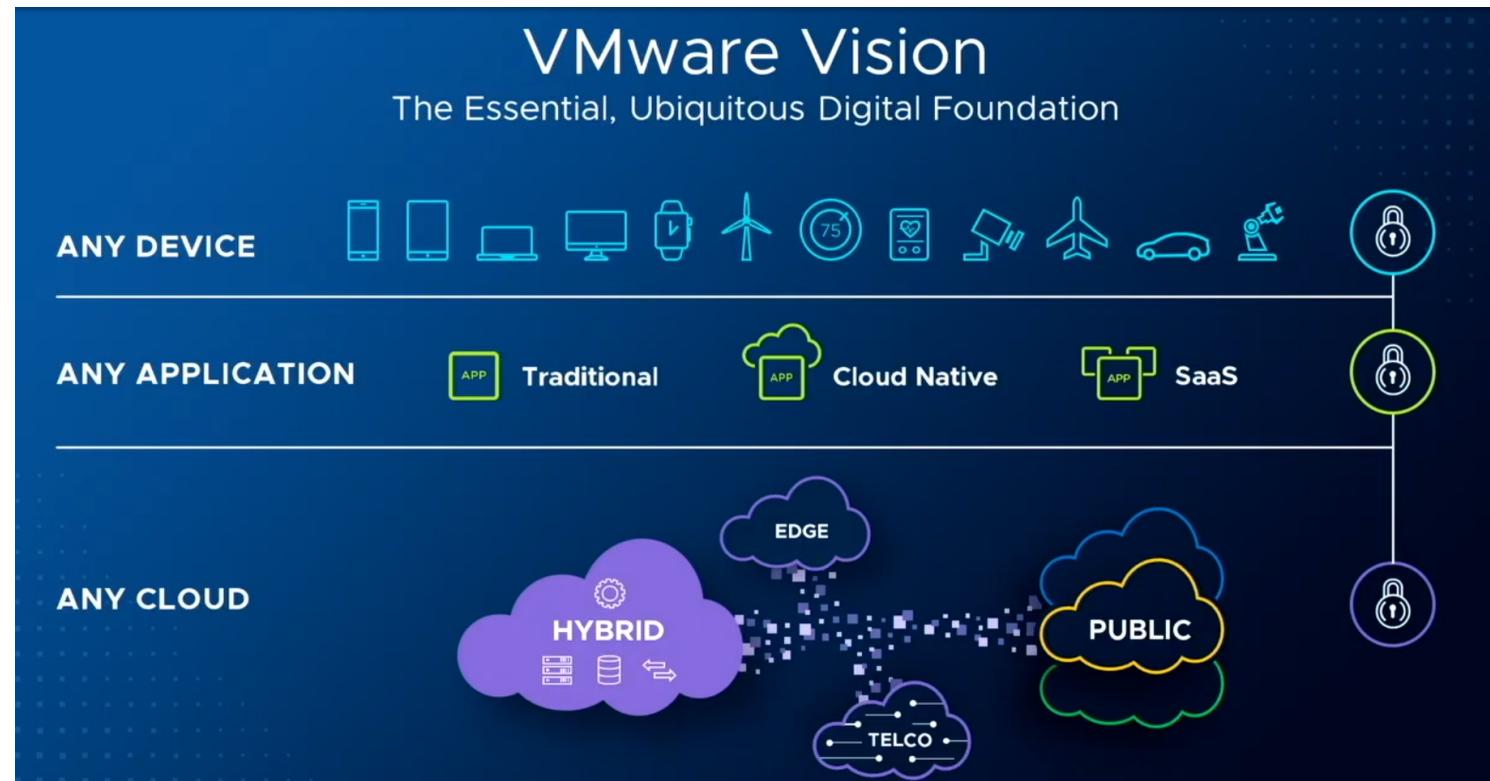

Minimal Viable Gaia-X: Service Composition

built on a permissionless and transparent
decentralized core grid

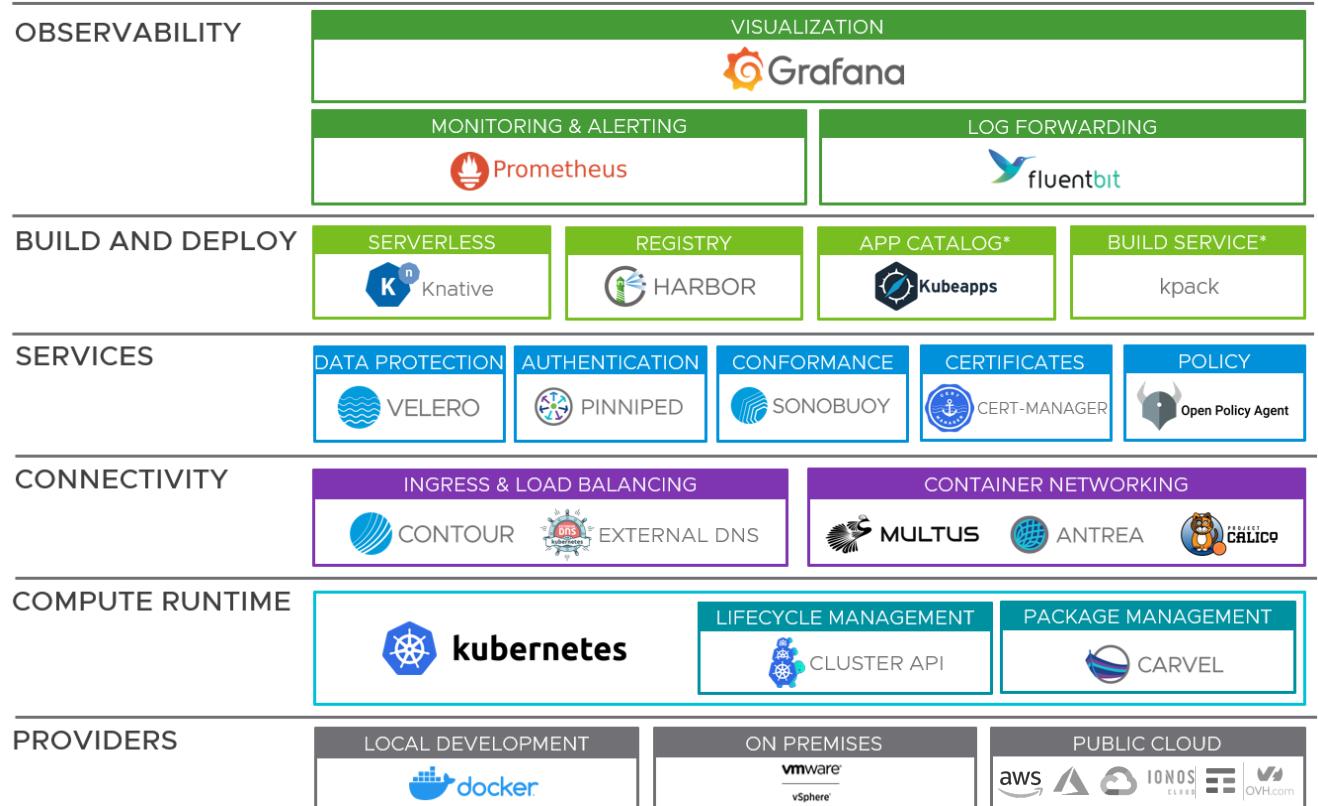

VMware Tanzu: Any service on any cloud

- ▶ abstraction layer to free apps from infrastructure
- ▶ multi-cloud developer experience on Kubernetes
- ▶ build, run & manage any app on any cloud
- ▶ open-source

VMware Tanzu: Any service on any cloud

- abstraction layer to free apps from infrastructure
- multi-cloud developer experience on Kubernetes
- build, run & manage any app on any cloud
- open-source

VMware Tanzu: Any service on any cloud

- ▷ deploy a Federation Service on any cloud with VMware Tanzu
- ▷ interoperable, reversible & portable
- ▷ cloud agnostic
- ▷ rapid deployment
